

TIFFANY GATHONI

Software Developer | Cloud, AI & Security Engineer

✉ gathonitiffany16@gmail.com ☎ +254 794832922  LinkedIn  GitHub  Hashnode

🇰🇪 Kenyan

PROFILE

Software Developer specializing in Cloud and AI Infrastructure. Proven ability to design scalable system architectures, implement serverless integrations, and optimize backend performance for high-reliability deployments.

PROFESSIONAL EXPERIENCE

- 07/2025 – 12/2025

Adamur (adamur.io) 
Software Development Intern
 - **System Integration:** Contributed to the technical development and integration of the core Adamur application, focusing on scalable RESTful data flows.
 - **Latency & Throughput Optimization:** Refactored backend logic to eliminate latency in the user-to-API loop, ensuring high reliability for the startup's initial production release.
 - **Technical Documentation:** Prepared internal MD70-style technical design specifications for modular application extensions.
- 2025

PlintCart 
Developer (E-commerce Platform)
 - **Serverless Architecture:** Developed a serverless backend using Netlify Functions for M-Pesa payment integrations and automated webhooks.
 - **Database Architecture & Security:** Designed and hardened Firestore security rules and schema to protect secrets and enforce least-privilege access.
 - **Optimization:** Reduced cold-start impact and implemented edge caching to maintain system stability in low-bandwidth scenarios.

PROJECTS, LABS & LEADERSHIP

- 2026

OpenClaw Autonomous Agent
Architecture & Development
 - Architected and deployed a custom OpenClaw AI agent, managing API integrations, execution loops, and backend stability for autonomous task execution.
- 2026

Cloud Architecture Sandboxing (KooLabs)
 - Executed rigorous stress-testing on AI inference acceleration modules and conducted network security audits within simulated Huawei Cloud environments to validate system stability.
- 2025 – Present

Mental Baddie
Co-Founder & Product Developer
 - Engineered the system architecture for an AI-powered mental wellness chatbot tailored for Gen Z users across Africa.

- Managed product development, go-to-market strategy, and implementation of end-to-end data encryption.

2024 – Present

Peer Mentorship

Assisting junior developers in debugging and logic-mapping within local dev communities.(Women in Tech Zetech, ALX)

TECHNICAL SKILLS

Cloud Infrastructure (Huawei Cloud/AWS)

ECS, OBS, VPC, Elastic Load Balancing (ELB), Auto Scaling (AS), and Identity & Access Management (IAM).

AI & Machine Learning

ModelArts training pipelines, AI Gallery management, Inference Acceleration, and data management for deep learning.

Development & Extensions

React.js, Next.js, Node.js, Python, and TypeScript for building custom application extensions .

Integrations & APIs

RESTful/SOAP Web Services, Oracle Integration logic, API lifecycle management, and serverless backend architecture (Netlify Functions/Firebase) .

Data Modeling & Reporting

Strong SQL/PLSQL skills, schema design, and automated data migration/ conversion .

Security & Networking

Threat mitigation, VPC security groups, IAM policy enforcement, and network traffic analysis.

DevOps & Tools

Docker, CI/CD Pipelines, Git/ GitHub, and architectural validation via KooLabs.

EDUCATION

2022 – 2025

Bachelor of Science in Information Technology

Zetech University

CERTIFICATIONS

HCCDA - AI (Huawei Cloud Developer Associate)

Mastered the ModelArts lifecycle, focusing on intelligent perception (OCR, Vision) and deploying model assets for real-world scenarios.

Software Development Certificate

Power Learn Project Africa |
Apr 2025

HCCDA - Tech Essentials (Huawei Cloud Developer Associate)

Proficient in core cloud services including ECS, OBS, VPC, and GaussDB to ensure system stability and low latency.

Cloud and Network Security (Cyber Shujaa)

Specialized in fortifying cloud environments, identifying vulnerabilities, and implementing defensive network protocols.
